

Course Overview

Course Description

Spanish II is a continuation of Spanish I, with a more in-depth study of both vocabulary and grammar. Students learn more precise vocabulary from previously introduced topics, along with that of completely new topics. New verbs are introduced, as are new verb tenses. Spanish-speaking countries and cultures already studied are discussed in greater detail, and different countries are introduced.

Goal

The goal of Spanish II is to expand the contexts in which students can effectively communicate and to expand the complexity of what they communicate. Students will have larger, more precise vocabularies, expanded use of verb tenses, and a deeper understanding of Hispanic cultures.

Scope and Sequence

Timeframe	Unit	Instructional Topics
