Our Mission

Every day at Kohler Schools we **inspire** inquiry, **engage** hearts, minds and bodies; and provide supports to ensure all students can **achieve** success.

Wisconsin Department of Public Instruction Vision

Implementing a Multilevel System of Support means providing equitable services, practices, and resources to every learner based upon responsiveness to effective instruction and intervention. In this system, high quality instruction, strategic use of data, and collaboration interact within a continuum of supports to facilitate learner success. Schools provide varying types of supports at differing levels of intensity to proactively and responsively adjust to the needs of the whole child. These include the knowledge, skills, and habits learners need for success beyond high school, including developmental, academic, behavioral, social and emotional skills.

Response to Intervention (RtI) Introduction

Core Principles of RtI

RtI is grounded in the belief that ALL students can learn and achieve high standards when provided with effective teaching, research-based instruction, and access to a standards-based curriculum. A comprehensive system of tiered interventions is essential for addressing the full range of students' academic and behavioral needs. Collaboration among educators, families, and communities is the foundation of RTI. In addition, effective problem solving, and on-going academic and behavioral performance data should inform instructional decisions.

Response to Intervention Definition

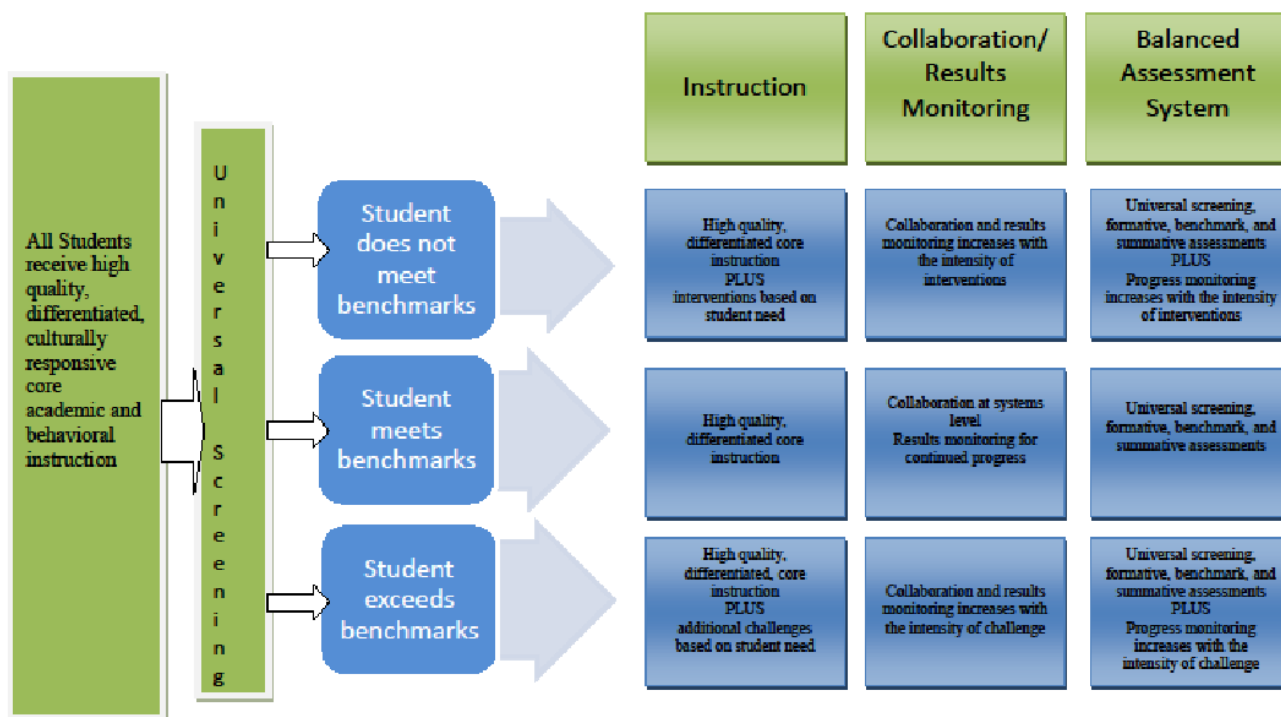

RtI is an integrated approach that includes general, remedial, gifted, and special education in providing high-quality instruction that is matched to individual student needs. It is based on a three-tiered model that monitors student progress with different levels of intervention intensity. By providing scientifically-based intervention to students, monitoring progress on interventions, and using this information to determine who is in need of more intensive services, RTI further builds on the requirements of the No Child Left Behind (NCLB) Act and provides a process for achieving higher levels of academic and behavioral success.

Wisconsin Response to Intervention Roadmap: A Model for Academic and Behavioral Success for All Students Using Culturally Responsive Practices

Revised March 4, 2010

Multi-Level System of Support in Your text Kohler

The Kohler School Districts RTI system is based on the Wisconsin RtI model and provides three tiers of support:

Adapted from *Response to Intervention: Policy Considerations and Implementation* (Batsche, et al 2005).
Note: Percentages are approximations and may vary by district.

Kohler School District

Tier 1: How we support All Students

High Quality Instruction

Evidenced based curriculum aligned to State Standards
Differentiation for on target, approaching target, and above target students
On-going formative assessments used to inform/change classroom instruction
Literacy skills taught through all content areas
High level of student engagement
Clear expectations

On-Going Assessment

Universal Screening

Reading:

5K-8th Grade: NWEA Measures of Academic Progress (MAP)

High School: Grades/8th grade MAP score/Credits

Math:

NWEA Measures of Academic Progress (MAP) – 5K-8th Grade

Grades/8th grade MAP score/Credits/-High School

Behavior:

All Grades: Number of Office Discipline Referrals/Attendance/Staff Referral

Mental Health:

All Grades: Targeted Universal Screening based on Grades/Parent or Staff Referral

Formative Assessments

Teachers use on-going classroom assessments during instruction to evaluate student performance and identify strengths and weaknesses to guide future instruction

Summative Assessments

Student learning is assessed at the local and State level. Summative assessments typically occur after instruction to assess what students have learned-Forward and Classroom Assessments

Collaboration

Teachers collaborate to make sure all students are learning and to meet instructional needs.
Data Teams meet to review universal screening

Tier 2: How we Support Students not at Benchmark or who Exceed Benchmark

Intervention

Kohler School District

Students who have been identified to be below benchmark receive “in addition to” instruction in area of need. Tier 2 includes the delivery of skill-specific, evidence-based academic intervention options in a small group setting in addition to core instruction. Skill instruction is explicit and discrete (a few skills at a time) and are matched to student skill deficits. Tier 2 for

students exceeding benchmark include additional challenges provided in addition to the core instruction but can also include curriculum compacting.

Behavior/Mental Health intervention can include Check in/Check out, mentoring, individual or small group counseling or skill building.

More Frequent Progress Monitoring (PM)

Students who are identified below benchmark and are receiving additional skill instruction will be more closely monitored for academic improvement. These students will receive brief (1-8 minute) assessment measures used to determine whether adequate progress is being made. Progress monitoring measures provide information on the effectiveness of instruction/intervention and are used in determining the level of support a student needs. Intensity and duration of interventions are based on PM data and student responsiveness. Progress monitoring is often done frequently, at least monthly and as frequently as once per week. Parents will receive information on their child’s progress at least quarterly.

Students who exceed benchmarks will have their rate of growth measured using normative growth goals on the NWEA MAP at least yearly.

CICO coaches review progress of students who are receiving behavioral interventions and pupil services staff review student’s academic behavior and achievement as well as brief mental health checkups to determine effectiveness of other mental health supports.

More Frequent Collaboration

Students who are receiving Tier 2 intervention and are below benchmark will be monitored at least monthly by the school’s Tier 2 Data Team. Based on systematic decision rules, the Data Team may reduce or increase the level of academic support a student receives. When the team determines a student is not making adequate growth, parents will be informed of the decision and the student will be referred to the school’s Problem Solving Team (PST) to determine an individual intervention plan (Tier 3 Intervention). Parents are vital members of their child’s education and may be invited to participate in their child’s PST meeting.

Students who exceed benchmark and whose needs are not sufficiently being met with differentiation, additional challenge, and course compacting will be referred to a PST meeting to determine additional programming options.

Tier 3: How we Support Students who are not making Adequate Growth Despite Tier 2 Intervention.

**More Intensive Intervention, Increased Progress Monitoring, Increased
Collaboration, & Fidelity Measures**

Tier 3 intervention/instruction includes the delivery of an intensive evidenced based academic intervention in addition to core instruction. Students in Tier 3 intervention who are below

benchmark will receive substantially more minutes of instruction in the identified area of need. Tier 3 intervention plans are individually based and can be delivered in very small groups (1:3) or one on one.

Progress monitoring for students below benchmark and who are receiving Tier 3 intervention will take place at least weekly using a reliable and valid tool that measure a student's rate of improvement and is sensitive to change.

Data Team meetings are held more frequently to monitor progress and fidelity checks are employed to ensure the intervention was delivered as designed, the educational plan was implemented as discussed, and that the student received the recommended minutes of intervention/instruction. Students, despite having received two Tier 3 interventions implemented with fidelity, who continue to display poor rates of improvement and have had at least two years of educational instruction may be referred for a Special Education Evaluation.
